WE THE PEOPLE

of the great brand of LINE Skis, 22 years strong and still pushing ski design to places it hasn't been yet, present to you this season's offerings. We promise to not to overuse terms such as 'game-changer', 'disruptive', 'next-level' and other marketing buzzwords. To not to exploit ski test results to painful lengths and overly explain technologies we made up anyway. Because we at LINE are just assuming you're not reading this and if you do, please just turn the page and look at the rad gear we made.

GEOMETRY

Angles and stuff – Not always sexy but the shapes, rises and tapers are the DNA of the intuitive & consistent feel of a LINE ski.

017_018

EARLY RISE™

The rise of the tip and tail begin earlier as the ski profile moves away from center making for easier turn initiation and helps get the skis up on plane more quickly. This also means effortless float in softer snow!

LONGER ACTIVE EDGE™

20% more of the sidecut edge length is in contact with the snow when turning which means MORE GRIP & LESS SLIP!

EARLY TAPER™

The widest point of the sidecut begins tapering earlier in the tip & tail which reduces hook ups in powder.

FIVECUT™

Not one, not two but FIVE different radii shapes are blended into the ski's overall sidecut to give you that intuitive control & unlimited turn shape.

CONSTRUCTION

Not just pretty on the outside, but also pretty on the inside! These are the guts of the ski that either give it a light & playful personality, stable & precise demeanor or both!

017_018

BAMBOO SIDEWALL

Durable and renewable wood that creates a responsive edge to edge feel while being sealed with epoxy to not let in any moisture to the core.

SIDEWALL™

Ultra high density polyethylene walls over the edges absorbs vibrations for maximum durability for a smooth, stable feel.

CAPWALL™

The best of both worlds! Cap on the top for light & playful performance with sidewall over the edge for added precision.

4D FIBERCAP™

4 directions of fiberglass are woven across the top of the core for durability without unnecessary weight.

CORES

Each core construction is chosen to enhance the key attributes of the ski. Whether we're focused on precision and stability or nimbleness and weight, rest assured we've made the best core for the job at hand.

017_018

CLOUD CORE™

Futuristically blended wood and composite materials create an impossibly lightweight and solid core.

PARTLY CLOUDY CORE™

A blend of light weight wood creating the best strength to weight ratio we offer.

MAPLE MACROBLOCK

2 full length Maple stringers surrounded by Aspen for increased strength and durability.

MAPLELITE MACROBLOCK

Solid Maple under foot with lightweight Aspen at the tips for durability and reduced swing weight.

BAMBOO CORE

A burly core that won't break the bank. Stronger for today's freestyle riding and sustainable fast growing wood makes for an awesome core.

ASPEN MACROBLOCK

100% Aspen for the lightest, most nimble feel.

SKI SUPERPOWERS

It's a bird, it's a plane, no...Wait it's the best technological advances in ski design for the last 22 years.

017_018

THIN TIP™

Super thin core & sidewall in the tips are 100 grams lighter per pair for reduced swing weight & tip bounce.

FATTY BASE & EDGE™

30% thicker base & edge, 2mm wide x 2.5mm high edge and 1.7mm thick base dramatically increases durability and tuning life of these skis.

DIRECTIONAL FLEX

The softer tip floats & initiates turns easily while the stiffer tail provides power, stability & high speed control.

SYMMETRIC FLEX

The same flex pattern in front and behind your boot conforms to terrain equally riding forward & backwards.

METAL MATRIX™

A metal titanal laminate provides more power & grip where you need it.

CARBON STRINGER CONFIGURATIONS

Carbon Ollieband - Prestretched carbon down the center of the ski for added pop and play in our freestyle skis

Magic Finger Filaments - New! A wide array of carbon stretching from tip to tail for added stability without sacrificing weight in our totally new Sick Day series.

PESCAO

Years in the making, the Pescado is Eric Pollard’s directional powder ski that’s radically different from anything out there and designed for as close to a surf-like feel in powder as possible!

LENGTHS:	180	CORE:	Partly Cloudy™
SHAPE mm:	158-125-144	BASE:	Sintered 1.1
WEIGHT/ SKI(g):	1950	FLEX:	Directional Flex™
