BE ONE

WITH YOUR BOOTS

For over 50 years, **LANGE** has consistently been found on the feet of the world's best skiers. Our sole focus is better-fitting, better-skiing boots. And we are the premium benchmark.

BE PASSIONATE

Since the beginning our passion for foot mechanics, recognition of its subtleties in relation to skiing, and desire to help skiers perform better has resulted in some of the most important innovations in ski boot design.

BE FOOT-CENTRIC

Constant collaboration with the best boot-fitters in the racing and retail worlds, and 3D scans of more than 40,000 individual feet have led to a deep understanding of how the skiing foot functions.

BE PRECISE

We develop state-of-the-art solutions to address those hard-to-fit areas; solutions that provide comfort without sacrificing performance. We then tirelessly handcraft, test, and repeat to deliver the ultimate blend of comfort and performance for every foot shape.

BE ONE

A great-fitting ski boot is a skier's most essential piece of equipment. Consistently the best in out-of-box fit, only LANGE delivers the performance solutions, ensuring every skier that steps into a Lange will **BE ONE** with their boots.

TECHNOLOGY

NEW DUAL CORE

Lange's newest shell technology utilizes our new "power injection" method, allowing us to inject two different durometers of high-grade plastic (PE, PU) into the mold at the exact same time. This new mono-injection process targets different durometers of plastic into key areas of the boot:

- Hard in the areas that transmit power to the ski (*spine, heel, lower shell*)
- Soft in areas that need to wrap the foot and lower leg (*instep, front of cuff*)

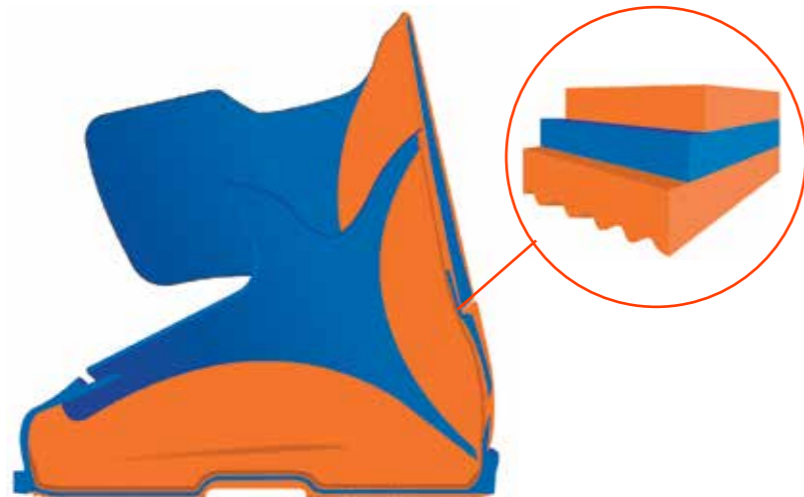

5 POINTS OF INJECTION
5 points of injection are used to inject the 2 materials at the same time

SANDWICH CONSTRUCTION

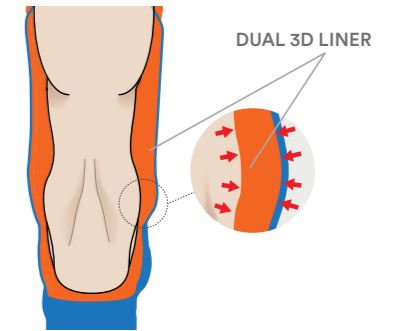

The plastic "sandwich construction" that results from this process creates elastic and absorption characteristics never achieved before for a noticeable increase in energy and liveliness, a more progressive and consistent flex pattern, and incredible power transmission.

NEW DUAL 3D LINER

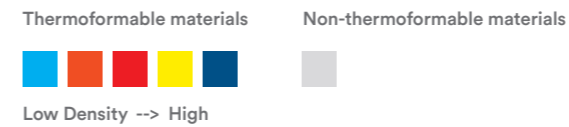

Lange has collected 3D scans of over 40,000 individual feet, and collaborated with its network boot-fitting experts to better understand the subtleties of the foot and different foot types. Our new DUAL 3D LINER is the result.

- 3D internal design perfectly wraps the foot and lower leg for our most comfortable, anatomic fit
- 3D external design perfectly matches the inner shell for the most precise and accurate power transmission

3D THERMO-FORMABLE

These new thermo-formable liners mold around the skier's foot and the internal boot shell, delivering the best balance of foothold, instant comfort and out-of-box fit. Materials of different densities are strategically integrated into the key fit zones, enhancing foot and lower leg wrapping and maximizing support for more efficient interaction between the foot, liner, and shell.

DUAL 3D LINER FULL

100% thermo liner
Highest density foam
3 types of foam

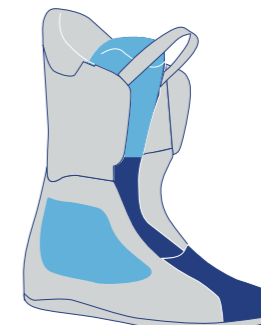

DUAL 3D LINER PERF

80% thermo liner
Lower leg, ankle, instep, toe box
Medium density foam

DUAL 3D LINER PRO

100% thermo liner
High density foam
2 types of foam

DUAL 3D LINER SPORT

60% thermo liner
Shin, ankle, instep, toe box
Low density foam

BE ONE with your boots and Be One with your line. Totally redesigned, the all-new RS is the result of our deep understanding foot mechanics, fit, and ski boot behavior. Developed in race, our new plastic sandwich construction – Dual Core – supplies incredible rebound and flex control for total control of your turn; while a new anatomical shell fit and Dual 3D liner are perfectly integrated, making the boot feel like a natural extension of your leg to deliver unparalleled precision and power transmission.

DUAL CORE

New sandwich construction supplies more energy and rebound for incredible power transmission and control.

DUAL 3D LINER

New anatomic 3D construction perfectly matches the inner shell, lower leg, and foot for our most comfortable and accurate fit, with thermo-moldable foam for customization where it counts.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

NEW RS DESIGN

Refined shell thicknesses, contouring, and reinforcement for a more powerful and progressive flex.

NEW ANATOMIC FIT (97mm)

Stronger heel hold, more defined ankle pockets, and more anatomic toe box for a more exact and precise fit.

SHORT CUFF

Built from the RS chassis, the all-new RX has the same racing pedigree but with enhanced all-mountain features and a new, more inclusive 100mm fit. Lange's new dual technologies – Dual Core and Dual 3D liner – are incorporated ensuring unparalleled levels of fit and performance, while the new 100mm last retains the strong heel lock and foot hold that's built into Lange's DNA but with a more instant, comfortable out-of-box fit so you can Be One with your boots in any terrain.

DUAL CORE

New sandwich construction supplies more energy and rebound for incredible power transmission and control.

DUAL 3D LINER

New anatomic 3D construction perfectly matches the inner shell, lower leg, and foot for our most comfortable and accurate fit, with thermo-moldable foam for customization where it counts.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

NEW RX DESIGN

Refined shell thicknesses, contouring, and reinforcement for a more powerful and progressive flex.

NEW ANATOMIC FIT (100mm)

More defined ankle pockets, anatomic toe box, and open instep for a more precise, comfortable fit.

An extension of RX, the award-winning, 102mm SX series expands on our "Choose Your Width" concept to ensure skiers with wider feet no longer have to sacrifice a comfortable fit for real-deal performance. Featuring all of Lange's key fit and performance solutions, the SX redefines the 102mm market, providing a more accessible fit with the essential, high-performance DNA often limited to narrower, race-oriented ski boots.

MONO-INJECTION (102mm)

The first and only 102mm mono-injection boot delivers the highest performance without sacrificing comfort for wider foot shapes.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

EASY ENTRY CONCEPT

Softer plastic insert over instep area allows easy, comfortable entry and exit.

CUSTOM TONGUE

Hollow instep area allows maximum customization where circulation is often cut-off and pressure points are common. More comfort, more warmth, more control.

ULTRA & MAX GRIP

Increased traction, grip and shock-absorption for hiking and walking.

The ultimate high-performance freeride boot, the award-winning XT series delivers Lange's proprietary blend of hiking versatility and real-deal downhill performance. WTR and Alpine compatibility, lightweight shell and liner construction, next-generation ski/hike system, patented Power V-Lock, and metal-on-metal locking mechanism supply maximum hiking mobility without sacrificing an ounce of Lange's legendary performance.

MONO-INJECTION

Provides a consistent flex in varying temperatures and allows easy customization for more precise comfort and fit.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

POWER V-LOCK/HIKE-SKI 2.0

Wider V-lock design increases range of motion (43°) while metal locking mechanism increases support for more powerful downhill performance.

ULTRA & MAX GRIP / WTR COMPATIBLE

Increased traction, grip, and shock-absorption for hiking and walking. WTR rocker soles (sold separately) allow more comfortable hiking and walking.

The best of both worlds. Lange's benchmark fit and legendary alpine performance meet the world of free-touring in the award-winning, XT FREETOUR. The solid sole design with Dynafit® certified inserts, ultra-light shell and liner engineering, and Lange's patented ski/hike system with Power V-Lock redefines what a touring boot is capable of, creating a new freetouring benchmark in weight (1770 g) and performance.

ULTRALON CUSTOM TOUR LINER

Lightweight Ultralon foam offers superior customization, insulation, and resistance to packing out, while Motion Control protection allows easy ROM for more comfortable touring.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

POWER V-LOCK/HIKE-SKI 2.0

Wider V-lock design increases range of motion (43°) while metal locking mechanism increases support for more powerful downhill performance.

SOLID SOLE w/ DYNAFIT®

Ensures secure, powerful energy transmission and steering; DYNAFIT® certified inserts offer dependable, trust-worthy touring performance.

ULTRA-GRIP WTR SOLES

WTR rocker soles offer more comfortable hiking and touring with no compromise to downhill performance. Ultra-Grip provides increased traction, grip, and shock-absorption.

GRILAMID SHELL

Delivers the energy, elasticity, and rebound of high-grade PE/PU plastics with substantial weight savings.

The strongest junior offering on the market, TEAM series boots are designed around the same award-winning technology as adult versions with enhanced junior fit features. Short Cuff (SC) models feature shorter upper cuffs, allowing more natural stance and range of motion for increased comfort and performance. Control Fit liners address the traditional hard-to-fit issues, alleviating common pressure points and increasing circulation for incredible comfort and warmth.

MONO-INJECTION

Provides a consistent flex in varying temperatures and allows easy customization for more precise comfort and fit.

NATURAL STANCE

Lange's neutral, upright stance delivers more efficient power transfer on modern skis for better, longer ski days.

SHORT CUFF (sc)

A shorter cuff (15mm in back/20mm in front) provides women and skiers with shorter leg shafts with a more natural stance for increased performance and comfort.
