

IN THE MOUNTAINS

DETAILS MATTER

A full-page photograph of a skier in silhouette, moving down a vast, smooth, snow-covered mountain slope. In the background, a range of jagged, snow-capped mountain peaks rises against a clear blue sky with a few wispy clouds. The lighting suggests a bright, sunny day, creating soft shadows on the snow.

IN THE MOUNTAINS, DETAILS MATTER.

At Liberty, our location in the heart of the Colorado Rockies informs everything we do. Our commitment to crafting great skis and doing business the right way means we sweat the little stuff. We test and refine our skis right in our backyard, dial in the construction, wrap them in beautiful graphics, and make sure they are available at the finest ski retailers, because all these things matter to us and are inspired by our surroundings.

Mountains can be unforgiving places, but we make them our home because with the right focus, they are the most rewarding places. Every decision and detail is amplified in the high alpine environment, and we wouldn't want it any other way.

At Liberty, **details matter.**

BENDING THE RULES

When the peaks of Colorado finally start turning from white to green, and the snowpack melts to feed the rivers, the staff at Liberty takes to the water. We are fortunate to live and work in the mountains where there is rarely a lack of outdoor activities, but fly fishing holds a special place in our history.

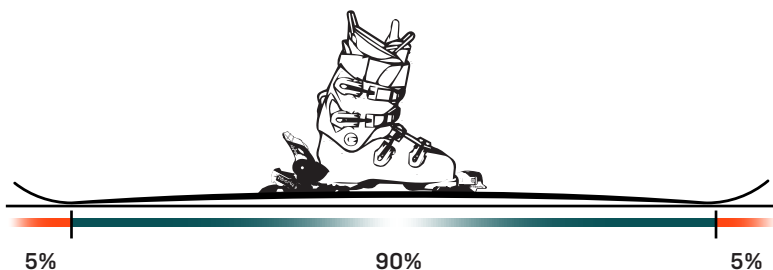

When we first started building skis 15 years ago, the prevailing wisdom was that quality ski cores could only be made from old-growth hardwood. We knew that before the rise of fiberglass and then carbon fiber, most fly rods were made from segmented bamboo. Strong fish, such as salmon and even tarpon, had been landed on these bamboo rods and we knew they could make exceptional ski cores with the right species selection, handling, and treatment. We tested and refined our process, and have since become the leader in bamboo ski construction.

We still use fiberglass and carbon fiber (like those fly rod builders), along with our signature bamboo laminate core construction to give every Liberty ski a unique feel on snow. At Liberty, we take the best attributes of natural and high tech materials and combine them in a way no other ski maker can. We don't mind bending the rules to make exceptional skis. At Liberty, **details matter.**

CAMBERROCKER

profiles.

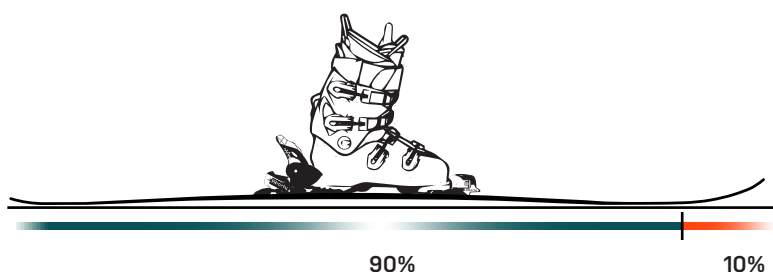

CLASSIC CAMBER | PARK PERFORMANCE

90% CAMBER 10% ROCKER

SKIS: TRANSFER

Creates tip and tail pressure for maximum edge grip and energy return.

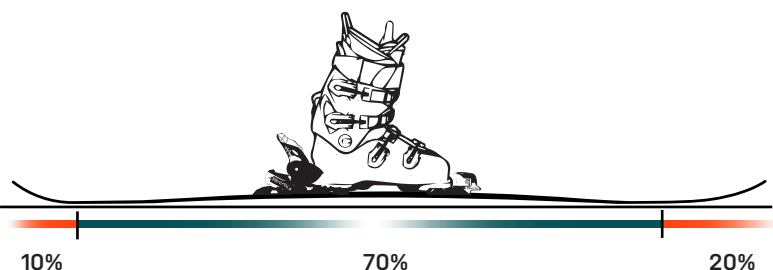

HAMMER ROCKER | FRONT-SIDE PRECISION

90% CAMBER 10% ROCKER

SKIS: V76, V82, V92, V80w, V87w

Comes armed with an early-rise tip and camber back to the tail for powerful edge grip and precise turn shape.

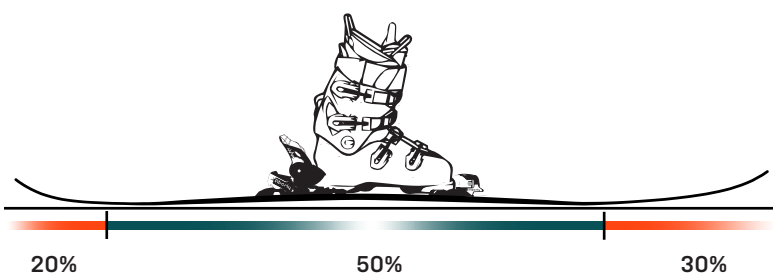

STEALTH ROCKER | ALL-MOUNTAIN VERSATILITY

70% CAMBER 30% ROCKER

SKIS: ORIGIN90, ORIGIN96, GENESIS90, GENESIS96, HELIX98, HELIXJR.

Features low tip rocker with camber underfoot and a slightly rockered tail for easy turn initiation and completion without sacrificing edge grip and liveliness.

BOMB ROCKER | POWDER PLAYFULNESS

50% CAMBER 50% ROCKER

SKIS: GENOME, ORIGINPRO, ORIGIN106, ORIGIN112, GENESIS106

Incorporates tip and tail rocker with positive camber underfoot for maximum floatation and playful feel, while maintaining hard-snow performance.

ORIGIN90

The Origin90 is focused on the fall line, but will still loosen up enough to play in the bumps or venture off groomed terrain. With lower tip rocker but the same energetic Speedcore/Carbon construction, the NEW Origin90 is an even better choice for those wanting a ski that can do it all from east to west.

sizes: 165, 172, 179, 186cm

dimensions: 126-90-112 @172cm

radius: 16.5m @172cm

weight: 1650g @172cm

core: speedcore carbon

camber/rocker: stealth

ORIGIN96

The award-winning Origin96 is back with a newly refined, early rise tip profile. With more edge contact in varied conditions, the Origin96 is ready to carve harder than ever before, but still retains a playful personality everywhere on the mountain. With bamboo, poplar, and carbon fiber, energy and stability are what you can count on.

sizes: 171, 176, 182, 187cm

dimensions: 130-96-118 @176cm

radius: 17.5m @176cm

weight: 1750g @176cm

core: speedcore carbon

camber/rocker: stealth

ORIGIN106

Our big-mountain, everyday charger is ready to crush deep days and low tide days alike. Performance driven and loaded with our bamboo, poplar, and carbon fiber construction, the Origin106 makes every day a good day.

sizes: 171, 176, 182, 187cm

dimensions: 138-106-128 @182cm

radius: 20m @182cm

weight: 1975g @182cm

core: speedcore carbon

camber/rocker: bomb

NEW

ORIGIN112

The NEW Origin112 features a refined camber/rocker profile in a new waist width. A solid bamboo, poplar, and carbon core works perfectly with the new geometry to ensure the fun never stops, even if the snow does. Surfy enough for the big days, but quick and stable for the days in between, the Origin112 will elevate your game.

sizes: 176, 184, 192cm

dimensions: 144-112-132 @184cm

radius: 21.5m @184cm

weight: 2150g @184cm

core: speedcore carbon

camber/rocker: bomb

ORIGINPRO

The OriginPro is built for one purpose, to slay the deep stuff. The bamboo and double carbon-stringer core produces energy and stability for all powder day adventures. If you live for the face shot, then look no further.

sizes: 176, 184, 192cm

dimensions: 150-122-142 @184cm

radius: 23m @184cm

weight: 2250g @184cm

core: speedcore carbon

camber/rocker: bomb

Photograph / STEVE REED

GENOME

DON'T FEAR THE GIRTH. The Genome is surprisingly nimble, due to tip and tail Bomb Rocker and lightweight construction. You can float, pivot, and romp in deep snow, but can lay down tracks on harder stuff because of the unique camber profile. The Genome will make you a believer.

sizes: 181, 187, 194cm

dimensions: 170-141-158 @187cm

radius: 27m @187cm

weight: 2450g @187cm

core: speedcore

camber/rocker: bomb

FREERIDE

GENESIS SERIES

GENESIS90

Look no further for performance and fun. The Genesis90 makes it easy to conquer front-side groomers or mixed conditions. With slight rocker in the tip and tail, and lightweight construction, you can play all day.

sizes: 151, 158, 165cm

dimensions: 126-90-112 @158cm

radius: 13m @158cm

weight: 1450g @158cm

core: xcore

camber/rocker: stealth

GENESIS96

Ski a little bit of everything? With X-Core Carbon construction, a newly refined early-rise tip, and secure mid-section, the Genesis96 is sure to turn heads from hardpack to your favorite powder stash.

sizes: 151, 158, 165, 171cm

dimensions: 130-96-117 @158cm

radius: 14m @158cm

weight: 1500g @158cm

core: xcore carbon

camber/rocker: stealth

GENESIS106

This ski is built for women who want to explore the entire mountain, no matter the conditions. With lightweight X-Core Carbon construction, playful rocker, and a big dose of awesome, the Genesis106 is ready for epic moments.

sizes: 157, 164, 171cm

dimensions: 138-106-128 @164cm

radius: 15m @164cm

weight: 1725g @164cm

MEN'S V-SERIES

Photograph / JON RESNICK

VMT

VERTICAL METAL TECHNOLOGY

Introducing the NEW V-Series, Liberty's front-side carving collection, featuring **VMT technology**. Using vertical metal struts sandwiched between bamboo and poplar, the V-Series is able to maintain **dampness and power** without the weight of traditional horizontal metal. Designed for smooth turn initiation, the V-Series has a metal tip and tail protector for damage control and vibration reduction. With the addition of spring steel plates underfoot for resilient flex and steering accuracy, and full carbon from tip to tail for precise edge control, the V-series is built for **demanding front-side skiers**.

NEW

V76

The narrowest ski in our line comes equipped with all the details you would expect from a precision carving machine, including VMT core, bamboo, and full carbon layup. Smooth and quick, with just enough early-rise in the tip to ease turn initiation, the NEW V76 will lay down tracks at any speed you can handle.

sizes: 165, 172, 179cm

dimensions: 126-76-106 @179cm

radius: 15m @179cm

weight: 1800g @179cm

core: VMT

camber/rocker: hammer

V82

The all-NEW V82 is a versatile front-side performer with the heart of a race ski. Powerful and precise, the V82 has incredible edge grip and dampening without the weight of a typical metal ski. The full-length vertical metal struts of the VMT combined with bamboo keep things quiet at speed, while the spring steel mounting plates and carbon have massive power reserve.

sizes: 165, 172, 179, 186cm

dimensions: 129-82-110 @179cm

radius: 16.5m @179cm

weight: 1850g @179cm

core: VMT

camber/rocker: hammer

V92

If you demand directional stability in a ski that can handle a wider variety of snow conditions, the NEW V92 is your ride. VMT core, slight tip rocker, and a full carbon layup create a smooth and powerful ride in firmer conditions, while the wider platform allows enough float to excel in fresh snow.

sizes: 165, 172, 179, 186cm

dimensions: 133-92-120 @179cm

radius: 17.5m @179cm

weight: 1975g @179cm

core: VMT

camber/rocker: hammer

ALL-TERRAIN

WOMEN'S V-SERIES

Photograph / DUSTIN SATLOFF

V80w

This approachable ski offers easy turn initiation and a snappy feel with the predictability of a flat tail and minimal rocker. The lightweight and energetic core construction of the V80w will keep you cruising from bell to bell.

sizes: 149, 156, 163cm

dimensions: 127-80-113 @156cm

radius: 11.5m @156cm

weight: 1500g @156cm

core: xcore

camber/rocker: stealth

V87w

The V87w is the perfect partner for icy groomers or corduroy cruising. Early-rise tip rocker makes turn initiation easy and intuitive, while the flat tail will finish any carve with confidence. Our signature bamboo and carbon construction rounds out this capable all-terrain performer.

sizes: 149, 156, 163cm

dimensions: 129-87-115 @156cm

radius: 12.5m @156cm

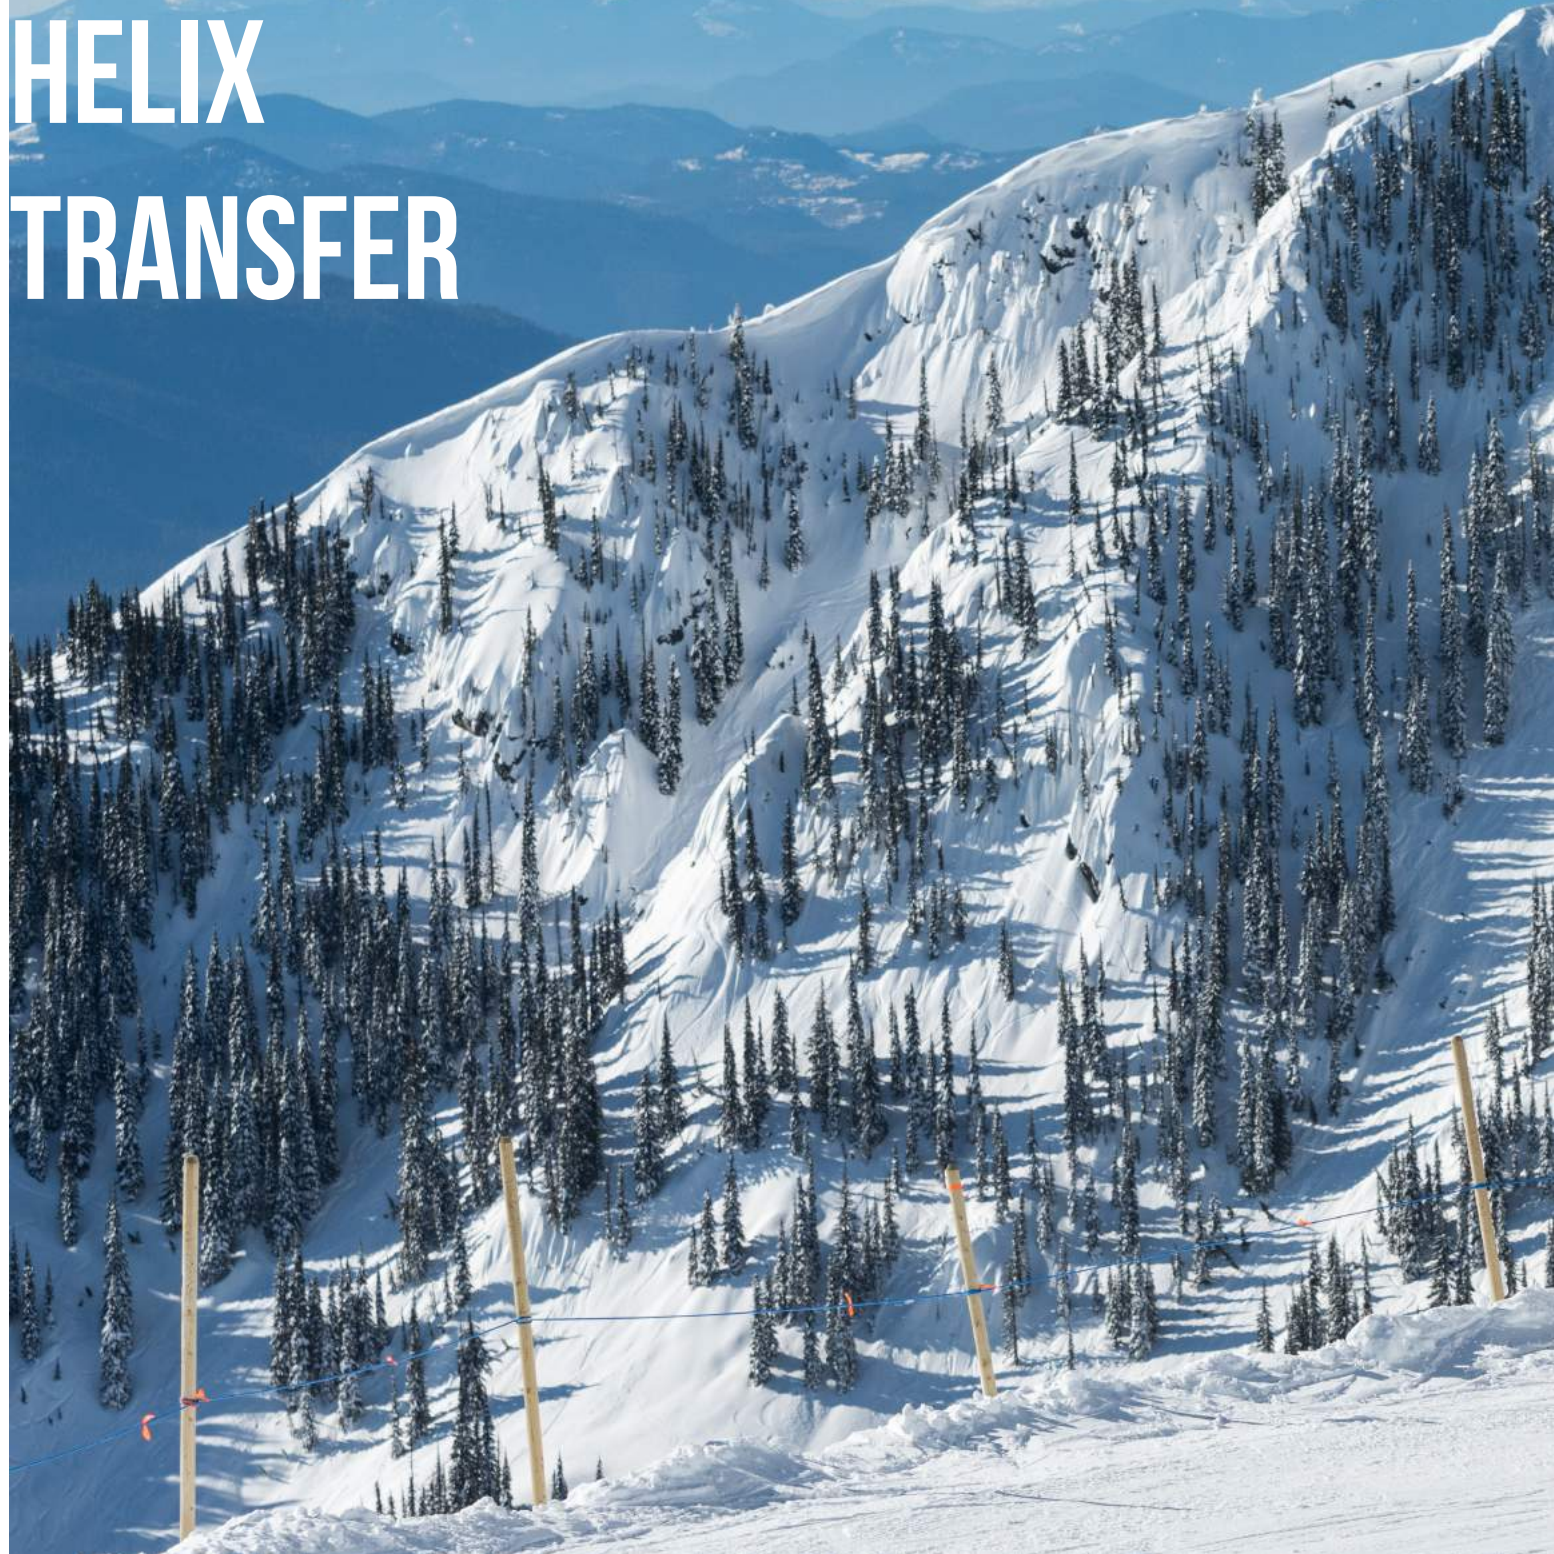

weight: 1550g @156cm

core: xcore carbon

camber/rocker: stealth

TWIN

HELIX TRANSFER

NEW

HELIX98

The Helix is back! Now in a more versatile 98mm waist, but retaining the do-anything DNA of its award-winning predecessor, the NEW Helix98 is a one-ski wrecking machine. Versatile, energetic, and stable, the Helix98 features easy turn initiation and floatation with control from our signature bamboo and poplar core. Crush the entire mountain with performance and a grin.

sizes: 165, 172, 179, 186cm

dimensions: 133-98-121 @179cm

radius: 19.5m @179cm

weight: 1850g @179cm

core: speedcore

camber/rocker: stealth

NEW

HELIX JR.

Say hello to our little friend, the NEW Helix Jr. But don't be fooled, this ski is meant for the next level. Bamboo and poplar core construction, aluminum tip and tail protectors, and a durable topsheet mean the Helix Jr. is ready for all-day play no matter where you live. Welcome to the big leagues.

sizes: 138, 148, 158cm

dimensions: 115-84-110 @148cm

radius: 14m @148cm

weight: 1450g @148cm

core: speedcore

camber/rocker: stealth

BACKCOUNTRY ADJUSTABLE POLES

ADJUSTABLE aluminum pole with a secure locking mechanism, light and comfortable grips, and swappable powder baskets. Adjust on the fly and make your powder day that much better.

sizes: adjustable

dimensions: 110-135cm

features:

- | 2 section pole- 18/16mm
- | Strong 7075-T6 Alu-alloy
- | PowerLock 2 locking mechanism
- | Light weight, warm, foam grips
- | Ultra-supple nylon straps

RETRO LIGHT BAMBOO POLES

LIGHT and stylish, these poles feature a carbon fiber tube with real bamboo wrap. Soft leather grips and powder baskets with tungsten/carbide tips complete the look.

sizes: 110-135cm

features:

- | Real leather handsewn grips & straps
- | 100% carbon ultralight inner shaft
- | Real bamboo wrap
- | Swappable powder baskets
- | Tungsten/carbide tips

ATTACK2 13 BINDING

Lock it down and go, the Attack2 13 has you covered.

DIN range: 4-13 DIN

brake sizes: 85, 95, 110, 130mm

features:

- | Race Pro heel for solid retention
- | Reduced standing height of 17mm
- | 1640g without brake
- | Extra wide FR Pro toe
- | Horizontal spring for elasticity
- | 65mm AFD for greater contact

ATTACK2 13 DEMO BINDING

Rock-solid freeski demo binding.

DIN range: 4-13 DIN

brake sizes: 85, 95, 110, 130mm

features:

- | Lower standing height
- | Metal toe track for strength
- | 259-386mm sole range, tool-free
- | Full toe and heel adjustment

ADRENALIN 16 A/T BINDING

Freeride performance and the easiest walk mode, the Adrenalin is the best of both worlds.

DIN range: 5-16 DIN

brake sizes: 95, 110, 130mm

features:

- | Freeride Pro heel for strength
- | Extra wide 80mm heel track
- | 60mm of length adjustment
- | Accepts alpine and A/T boots
- | Free flex sliding rail
- | 90 degree toe pivot for touring
