# EVERYTHING WE DO IS DEFINED BY OUR PASSION FOR SKIING

---

Atomic was founded in 1955 to drive the sport of skiing forwards with product that sets new standards, blending innovation and quality with insight from the world's greatest skiers. Atomic's products connect people with the sport they love through exceptional product experiences.

2022 will see our race proven Revoshock Technology extend to the new and hugely versatile Redster and Cloud Q skis, offering greater stability and acceleration across all piste conditions. A 14-year partnership with Chris Benoit continues to evolve and the Bent family extends to welcome the Bent 110. Atomic's comprehensive ski-touring range offers an unrivaled selection of Boots, skis and the new multi-norm Backland Helmet. We welcome cross-country skiing superstar, Dario Cologna, to the Atomic family. Dario will take the new Redster Carbon boots to Beijing in search of a fifth Olympic gold medal.

# PLAYFUL PROGRESSION FROM FREERIDE TO FREESTYLE

---

THE BENT FAMILY

If you're a skier who sees the mountain as a blank canvas, then the new Bent Family has the brush with which to paint your masterpiece. Designed and developed in collaboration with artist and Atomic freeski athlete Chris Benchetler. The award-winning signature ski has evolved every season over the last 14 years and is now a full collection of freeride and freestyle skis all built with the same playful progression that inspired the original ski. From powder slashing to pillow dropping, huge airs to stomping impossible landings, every ski in the Bent Family is built with one purpose – to connect your imagination and creativity to the mountain.

# BENT FAMILY

### Playful progression

From freeride to freestyle, the Bent Family delivers the broadest bandwidth of performance characteristics for any terrain. Designed by Chris Benchetler, developed and loved by the Atomic Freeski Team, every Bent is super playful in big mountain powder and fearlessly progressive in the park.

### Surfy stability

HRZN Tech Tip & Tail delivers 10% more surface area for awesome flotation in deep snow without adding any width or weight to the ski. This feature also creates a more relaxed tip and tail for more playful, progressive performance in freestyle terrain.

### Set your imagination free

Leaving true ingenuity to the skier, abstract base and top sheet graphics reinterpret Benchetler's hand-drawn artwork to encompass a passion for self-expression and creating art through skiing.

# MAVERICK

MAVERICK 95 TI

### Exact & Relaxed

Strong and smooth, Maverick utilizes OMatic Construction to create a core that produces the ultimate balance of stiffness and flex throughout the length of the ski.

### Balanced performance

Blending the perfect amount of rocker with camber underfoot for maximum effective edge contact during the entire course of every turn, Flow Profile delivers the ideal combination of shovel taper, tip rocker, and HRZN Tech Tip to create a ski that hooks up on hardpack as well as floats in fresh snow.

### Strong power to weight ratio

Just what an all-mountain ski requires and nothing more. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and Titanal layers or carbon inserts, OMatic delivers simple, lightweight and seriously sturdy performance.

# MAVEN

MAVEN 93 C

### Exact & relaxed

Smooth and intuitive, Maven utilizes OMatic Construction to create a core that produces the ultimate balance of stability and flex throughout the length of the ski. The same construction featured in the new Maverick, purposely tuned for women; Maven delivers powerful skiing in every condition.

### Balanced performance

Blending the perfect amount of rocker with camber for maximum effective edge contact during the turn, Flow Profile delivers the ideal combination of shovel taper, tip rocker, and HRZN Tech Tip to create a ski that hooks up on hardpack as well as floats in fresh snow.

### Strong power to weight ratio

Just what an all-mountain women's ski requires and nothing more. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and carbon inserts, OMatic delivers simple, lightweight and energetic performance.

# BORN ON THE RACE COURSE. BUILT FOR THE PISTE.

Each Redster ski traces its DNA to World Cup competition. Designed with input from skiers like Mikaela Shiffrin, Sofia Goggia, Marco Schwarz, and Aleksander Kilde, no detail is overlooked. When you step into a pair of Atomic Redster skis and arc the perfect turn in fresh morning corduroy, you become part of our sixty-five years of skiing heritage. You enter the tradition of meticulous preparation and winters spent perpetually seeking your best.

The Redster line covers every aspect of high-performance on-piste skiing. Chase speed and precision with the race-ready Redster G and Redster S. Create turns of any radius on the versatile Redster X and rip the piste in all conditions from morning hardpack to afternoon slush on the new Redster Q.

# THE ONE-SKI SOLUTION FOR ALL PISTE CONDITIONS

—  
REDSTER Q

From the first chair, turns knifed into the piste, tracks laid deep around imagined gates to the warmth of a spring afternoon, the piste turned to variable chop. Confidence, precision, and speed are constant requirements. The Redster Q packs World Cup winning technology like Revoshock into a ski designed to tackle whatever the piste can throw at you. 85mm underfoot and 65 years of chasing speed combine to create the ultimate all-piste weapon: The Redster Q.

# REDSTER Q

REDSTER Q9 REVOSHOCK S + X 12 GW

### All piste conditions, all day long

This is not a ski for race gates or speed suits. The Q wants to get out and run. It excels on firm morning corduroy, slashes through chop and handles slush with aplomb. When the on-piste conditions get a little dicey, the Redster Q is right at home.

### Wider waist, wider ambitions

When you ski open-to-close, you're going to face changing snow conditions. With up to 85mm of waist width, the Redster Q wants to look a little further, to explore a little more.

### Race-inspired, exploration-minded

The Redster Q traces its DNA straight to Atomic's World Cup-winning Redster program. With Revoshock, Power Woodcore, and a Titanal powered laminate, this ski has racing in its blood and exploration in its soul.

# CLOUD Q

CLOUD Q14 REVOSHOCK S + X 12 GW

### All piste conditions, all day long

The Cloud Q can take on the groomers in any condition, turning every run into an exercise in total freedom. And at the end of the day when conditions are rough, the Q can dial back its rebellious streak and be forgiving.

### Wider waist, wider ambitions

With up to 83mm underfoot, the Cloud Q can do more than its narrower Cloud family members. It's ready to float through the new snow of a storm day, handle the slush or blast through the chop of late afternoon.

### Race-inspired, exploration-minded

The Cloud Q shares its technical DNA with its extended Redster family – loaded with Revoshock and a Titanal powered laminate – turning even the toughest groomers into a canvas for laying down beautiful arcs through the snow.

# FIND YOURSELF IN THE BACKLAND

When you step into the backcountry, the conveniences and demands of the modern world fall away, replaced only by what you carry with you: perseverance, self-reliance, and attention to detail. Values cultivated and lessons learned in the Backland remain long after the day is done, and your gear is stored away. The Backland range takes you away from the lift lines and into your dream lines. From threshold efforts up the skintrack to long traverses, deep turns, and moments shared with friends.

## SEGMENTATION TOURING

### FAST AND LIGHT

The mountains are your hallowed training ground, and you need equipment that lets you climb efficiently and handle the downhill with confidence. When you're chasing personal bests and massive vert, reach for the Backland UL.

### ALL-ROUND

Whether you're planning a day-tour or a quick lap after work, the all-round excellence of the Backland series is designed so you'll enjoy every aspect of backcountry skiing, from the perfect kick-turn to the last descent of the day.

### FREERIDE TOURING

Your Freeride touring equipment glides through the snow. It's weight optimized so you ascend easily. And since it's built to perform in variable conditions on the most intense lines and proven on the Freeride World Tour you know you can send it on the way down.

# BACKLAND FAMILY

### BACKLAND UL

#### Ultralight efficiency for maximum vert

Minimize weight and maximize performance – uphill and down. Efficient and ultralight, the Backland UL lets you move uphill like a mountain goat and descend with confidence.

### BACKLAND

#### Tour the entire mountain

Strike the perfect balance between weight minimization, efficiency, and still have enough platform underfoot to confidently rip the lines that catch your eye from the skintrack.

### BACKLAND FREERIDE

#### For big lines and bottomless pow

The Backland Freeride range is optimized to save weight for the ascent, and downhill-proven on the Freeride World Tour. Go up comfortably, and send it as hard as you like on the way down.

TOURING SKIS

# BACKLAND UL

BACKLAND 85 UL

### Futureweight design

A reengineered Carbon Fiberglass construction for dynamic touring performance means speed on the skin track and the snappiest kick turns you can possibly imagine.

### Blower, corn, and everything in between

85mm underfoot gives you a stable platform in any snow conditions. All Mountain Rocker and HRZN Tech create float and keep the handling nimble wherever your tour takes you.

### Quick up, quick down

Superlight, ultra-strong construction makes big ascents, dawn patrol laps and long traverses a pleasure, while the advanced build qualities let you descend as hard as you like.

## TECHNICAL SPECIFICATIONS

### FAST AND LIGHT

# SKIN TECHNOLOGIES

## HYBRID GLUE

Our Hybrid Skins feature a special 2.0 Hybrid Glue that gives the skins stronger hold at low temperatures and makes them easier to handle. In addition, it will renew with a quick wash with a Hybrid cleaning kit.

## CLIP OVERVIEW

Our skins feature optimized Tip- and Tail-Clips for relevant ski models – and target users.

### UNIVERSAL TIPCLIP

### ATOMIC TIPCLIP

### RACE TIPCLIP

### UNIVERSAL TAILCLIP

### ATOMIC TAILCLIP

### RIVETED TAILCLIP

## CUTS

### MULTIFIT CUT

MultiFit Cut means the skin can be cut in multiple widths or lengths.

### PREFIT CUT

PreFit Cut means that the skin is custom made for an individual ski without additional fitting or trimming.

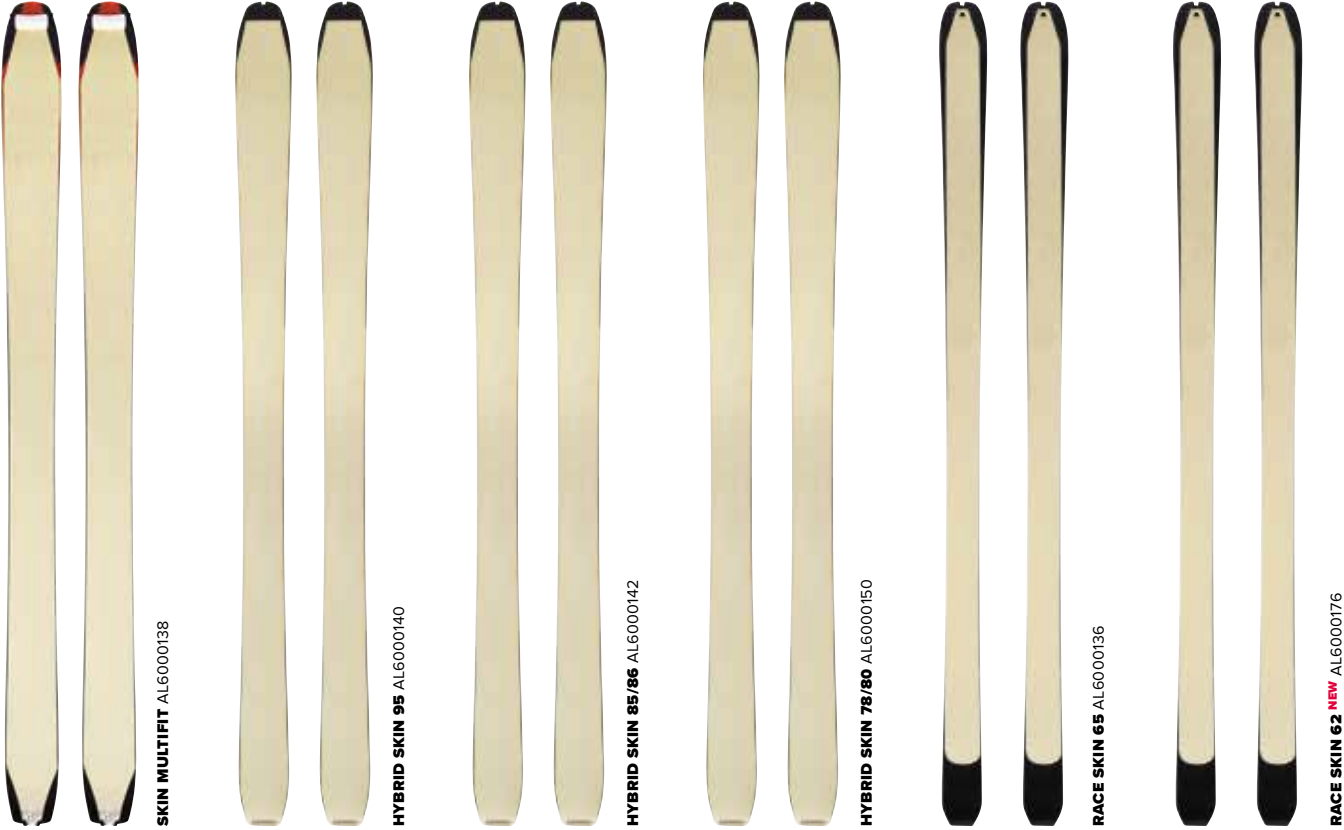

### STRAIGHTFIT CUT

StraightFit Cut means the skin doesn't follow the ski's sidecut but is straight to save weight.

# BACKLAND SKI TECHNOLOGIES

Our skis consistently outperform other skis in their class. One reason is our constant strive for meaningful, targeted innovation that makes a genuine difference.

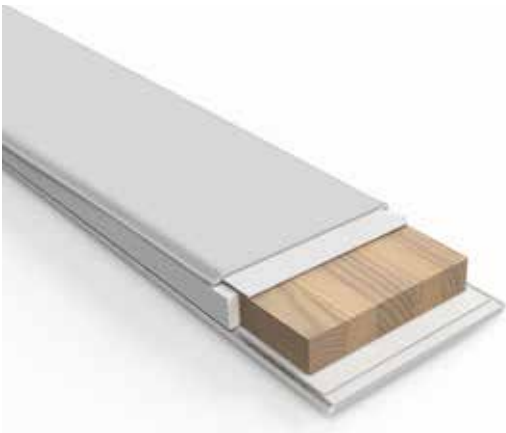

|                   |                                                                                                                                     |                                                                                                                                      |                                                                                                                                    |                                                                                                                   |

## CORES

**ULTRA LIGHT WOODCORE**  
The combination of caruba and poplar wood makes this core ultra light, for skis that are all about low weight.

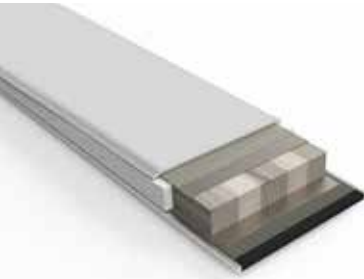

**LIGHT WOODCORE**  
Made from poplar wood, this core optimizes the ski's weight without sacrificing any shock absorption or stability.

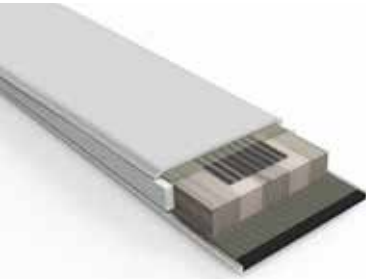

## LAMINATES

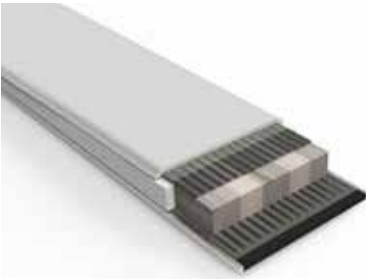

**TITANIUM POWERED**  
A Titanal layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

**CARBON BACKBONE**  
An ultra-lightweight carbon insert that runs the length of the ski like a stabilizing backbone.

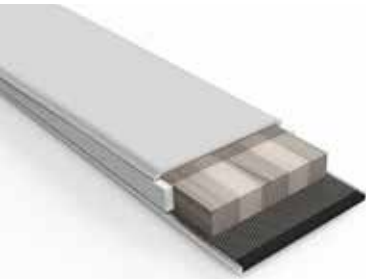

**CARBON FIBERGLASS**  
Carbon Fiberglass composite layers produce an ultralight ski that offers ultimate stability and power for highly dynamic performance.

**FIBERGLASS**  
Continuous fiberglass layers create a ski that is smooth and stable while remaining lightweight and dynamic.

**SL FIBERGLASS**  
High-tensile continuous fiberglass layers for a ski that is super lightweight while delivering very stable, smooth and energetic performance.

**X FIBERGLASS**  
Resembling an X, cross-woven fiberglass layers run across the length and width of the ski for stiff and strong power transmission and improved edge grip.

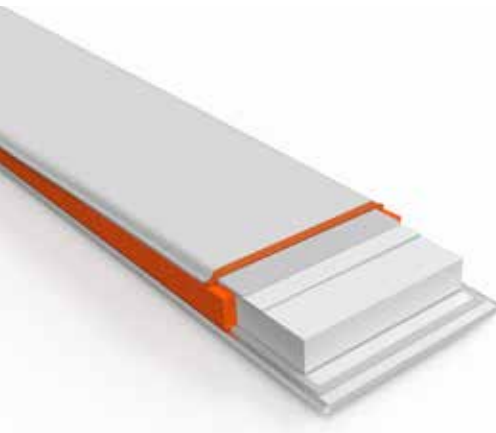

## HRZN TECH TIP

HRZN Tech adds 10% more surface area at your ski tips. For awesome floatation in powder plus less tip deflection and better tracking through chop.

## DURA CAP SIDEWALL

Sidewall from base to top sheet, for controlled power transmission and great edge grip. The rounded shape of the Dura Cap is a fantastic durability feature as it picks up fewer dents and dings.

# ALPINE BINDINGS

Verified by engineers and validated by professional athletes, Atomic bindings have been tested and skied under the most extreme conditions. From Overall World Cup globes to Olympic golds, winning X Games to the Freeride World Tour, descending from earth’s highest peaks and crossing Antarctica – our bindings have conquered the roughest race courses and the toughest mountains. Never settling, we constantly source and test new materials to deliver the most advanced binding technologies that allow skiers to reach the next level in the sport.

# STRIVE

STRIVE 14 GW

### Low center of gravity

Low center of gravity of the LDN Toe places the binding closer to the ski for better next-to-snow feel, more direct response and quicker reaction throughout the turn. A slightly ramped chassis positions the skier in a more neutral stance while preserving the natural flex and arc of the ski.

### Lightweight reliability

Robust and extremely lightweight, Strive shaves weight without compromising durability by using just enough metal where it's needed most. The result is an all-mountain binding with a lower swing weight for easier maneuverability and strong, proficient skiing all day long.

### Ski the way you want

Approved by the Atomic Freeski team, Strive delivers a super stable platform that excels in every situation and snow condition. Whether it's all-mountain, freeride or freestyle – this is the binding that allows you to ski exactly the way you want, wherever you want.

BINDING TECHNOLOGIES

**PATENTED STEP-IN AID**  
Our patented step-in aid guides position your boot perfectly.

**CLIMBING AID**  
With a flick of your pole, you have hasslefree and easy switching between different climbing positions.

**HIKE AND RIDE SWITCH**  
Blending the best of both worlds, a simple flip of the Hide and Ride Switch quickly transforms the Shift from touring to freeride binding – and back again.

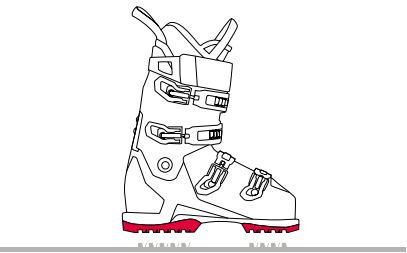

GRIPWALK

GripWalk is a sole/binding system that makes walking in ski boots significantly more comfortable, while also reducing the chance of slipping. Yet the GripWalk system also guarantees outstanding on-snow performance.

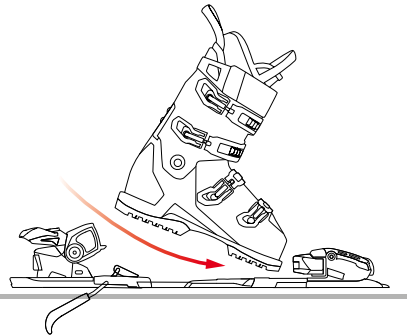

**BETTER WALKING, MORE GRIP**  
A high-profiled slip-resistant sole leads to outstanding grip for walking.

**NO HEIGHT ADJUSTEMENT**  
Simply step-in: Bindings with GripWalk Logo need NO height adjustment – even when used with regular alpine boots and soles.

**WALKING COMFORT**  
Increased walking comfort and improved natural roll thanks to curved rubber sole.

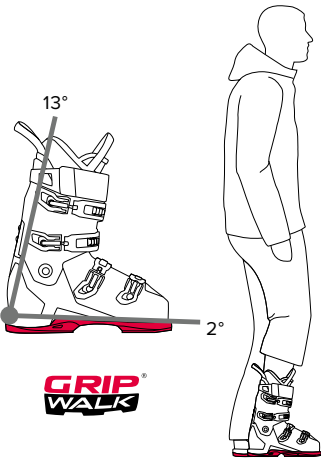

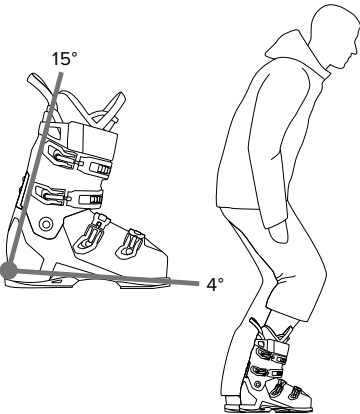

**ISO 5355 - ON A FLAT SURFACE**  
Standing on a flat surface, ISO 5355 soles preserve Atomic's athletic stance.

**GW - ON A FLAT SURFACE**  
Standing on a flat surface, GripWalk soles make the geometry more upright and more comfortable.

**IN GRIPWALK BINDING**  
In a GripWalk binding, a GripWalk boot regains Atomic's athletic stance.

AFTERMARKET PARTS

CRAMPONS

Please find all Atomic spare parts in our digital Spare Parts Catalog.  
Please refer to the Tech Manual for detailed technical information regarding our bindings.

BOOT AND BINDING COMPATIBILITY

# BOOTS THAT FIT

Whether its reaching maximum speed on a race course, touring to distant peaks or exploring the entire mountain from top to bottom – the better a ski boot fits, the more capable the skier becomes. The critical connection between you and your skis, perfectly fitting boots deliver next-level performance, unrivaled comfort, and infinite possibilities. Choose between: Atomic's World Cup proven Redster race boots, the Hawx family including all-new all-mountain Hawx Magna boots or our super lightweight and versatile Backland touring boots – no matter your foot shape or where you want to ski, we have the Boots That Fit.

## ATOMIC ACADEMY

What is the Mimic liner technology and why is it better than 3D? What are the differences between plastics? What makes an Atomic Hawx boot a Hawx? These are just some of the important questions we often get asked. Whether it's getting to know the basics or diving deep into professional boot-fitting, the Atomic Academy website offers you the exclusive opportunity to expand your knowledge. Learn more about Fundamentals, Fit and Geometry of Atomic ski boots.

Explore the Atomic Academy online.  
In case you do not have access yet, please ask your Atomic Area Sales Manager.

The Atomic Academy offers bootfitters the exclusive opportunity to expand their knowledge: first hand know-how, from professionals to professionals in an in-person workshop or unique live stream setting.

# MIMIC PROFESSIONAL

MIMIC PROFESSIONAL LINER

## Supreme fit

The result of years of incessant ski boot development for Atomic's top World Cup racers, Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to deliver a supremely customized fit with absolute precision.

## Unrivaled comfort

Utilizing special foam compounds that precisely fill the space around your foot to create a personalized custom fit, the liner perfectly conforms to the anatomy of your foot and ankle areas eliminating the painful break-in period. Unrivaled comfort and increased warmth allow you to focus on skiing.

## Next-level performance

Immediate power and energy transmission from foot to ski. A precise foam-molded fit eliminates all space between the liner and foot / ankle areas while Mimic technology produces an optimal next-to-shell fit. The result is superior power transfer and the ultimate interface between skier and ski boot.

Our mission is to drive the sport of skiing forward. For more than 60 years, our equipment has powered professionals and enthusiasts alike to achieve their full potential — from the top step of the World Cup podium to the first chair at the local hill. Inspired by our history and determined to push the limits of performance, we created a range of Redster and Hawx ski boots designed to provide the ultimate skiing experience that you've never had before: the Atomic Professional Series.

The innovative Professional Dual Strap combines two elements together for secure, balanced performance. Elastic shock absorbing portion smooths out choppy terrain and increases damping while static section provides pure power and energy transmission.

Customizable V<sup>3</sup> Tongue System allows you to select the ideal tongue thickness to suit your needs. Choose between Low Volume (LV) fit, Medium Volume (MV) fit and High Volume (HV) fit for the ultimate interface between shin and liner.

# HAWX MAGNA

### Ultimate wide fit

A highly anatomical ski boot featuring a wide, high-volume 102mm last, this next-generation boot offers a great fit right out of the box and provides a 100% customizable fit and geometry. The revolutionary Mimic liner takes custom fitting to a new level by exactly shaping to the foot and leg for a supreme fit.

### All Day comfort

With its fully customizable Mimic liner technology, an entirely new level of comfort, warmth, and responsiveness can be achieved. Combined with its lightweight shell construction and easier than ever step-in/step-out, this ski boot sets the new standard for all day, everyday comfort.

### Next-level performance

Made with Atomic's True Flex PU to maintain a smooth and progressive flex in a wide range of temperatures, Prolite construction delivers powerful performance by adding reinforcement in critical zones of the lower shell and upper cuff while keeping the boot agile.

# TOURING BOOTS

**BACKLAND  
ULTIMATE**

Backland Ultimate is the lightest touring boot in the Atomic line-up and is perfect for getting to the top of the ascent in the fastest way possible.

**BACKLAND  
UL**

Backland UL is a lightweight touring boot built for efficient climbing, quick transitions and solid skiing performance. This is the ideal boot for ski tourers who are mindful of the boot's overall weight.

**BACKLAND**

Backland offers the ideal balance of light weight climbing efficiency and a secure fit for controlled and responsive descending. This is the perfect all-round boot for ski tourers at every level.

**HAWX  
XTD**

The Hawx XTD boots combine the skiing power and all-mountain capability of Hawx with the natural movement of Backland. This is the ideal boot for those skiers who tour up and live for the down.

# BACKLAND

Secure fit

This 98mm last boot features a next-generation Cross Lace 2.0 closure system that securely wraps the foot. The brand-new 3D Platinum liner with Dry Fit Foam creates a phenomenal and longer lasting fit that provides improved foot hold over previous Backland boots.

Touring comfort

Delivering easier than ever step-in/step-out, this boot also offers increased cushioning and foot hold thanks to its 3D liner made with Dry Fit Foam. Breathable zones in the liner allow excess heat to escape, keeping your feet drier and warmer.

Next-level skiing performance

The Free/Lock 4.0 ski/walk mechanism and Frictionless Pivot allow for 74° of epic natural movement for effortless climbing. The powerful carbon construction and new buckle closure systems take Backland to the next level in skiing performance.

# BOOT TECHNOLOGIES

**CROSS LACE 2.0**

This next-generation closure system securely wraps the complete foot creating a powerful fit with unparalleled foot and ankle hold. This fit is achieved by lacing the cable through the buckle, allowing for better shell wrapping, easier on and off, personalized settings and a better overall fit.

**BOA® FIT SYSTEM**

Dial in to a fast, effortless, precision fit that delivers a perfect connection between your body and the equipment, keeping your foot secure and maximizing control. Push in to engage, turn to tighten and pull up the dial for a fast release.

**DRY FIT FOAM**

Backland liners feature anatomic 3D construction with DryFit Foam that uniformly envelops the foot for a best-in-class first fit. Delivering lightweight ski touring versatility with increased downhill performance, DryFit Foam offers greater resistance to packing out over EVA foam.

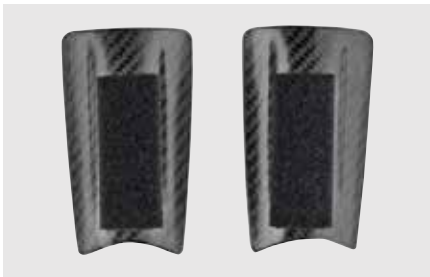

**DURA SHIELD**

Dura Shield is a two-stage protection for the liner. A structural mesh textile is used in the liner construction that is resistant to stretching, scratching, or tearing. This highly durable material is combined with an additional protective layer which helps to protect it from rivets or sharp parts of the shell and greatly improves the longevity of the liner.

**STRETCH GUARD**

Backland boots feature our new and improved Stretch Guard, which utilizes an all-new 2-layer construction that offers greater waterproofing, improved durability and easier step-in/step-out.

**CARBON TONGUE SHIELD**

A lightweight carbon insert that can be attached to the existing liner of a Backland touring boot; the Carbon Tongue Shield protects the shin while flexing forward. The technology significantly improves power transfer and allows thinner, lighter touring liners to ski more like an alpine liner.

**FRICTIONLESS PIVOT**

Igus polymer bushings provide a completely natural movement for effortless ascents.

**FREE / LOCK 2.0:**

A robust external ski/walk mechanism that is durable, powerful and easily cleaned of snow and ice. Found on Backland V1 and Hawx Ultra XTD it offers 13° and 15° of forward lean adjustment.

**FREE / LOCK 3.5:**  
A robust external ski/walk mechanism for the Backland Ultimate that allows for single-handed ski and walk functionality. This dual-purpose mechanism automatically opens the boot cuff for fast and easy transitions. Offering 13° and 15° of forward lean adjustment, it features updates that provide greater longevity to the Dyneema rope.

**FREE / LOCK 4.0:**

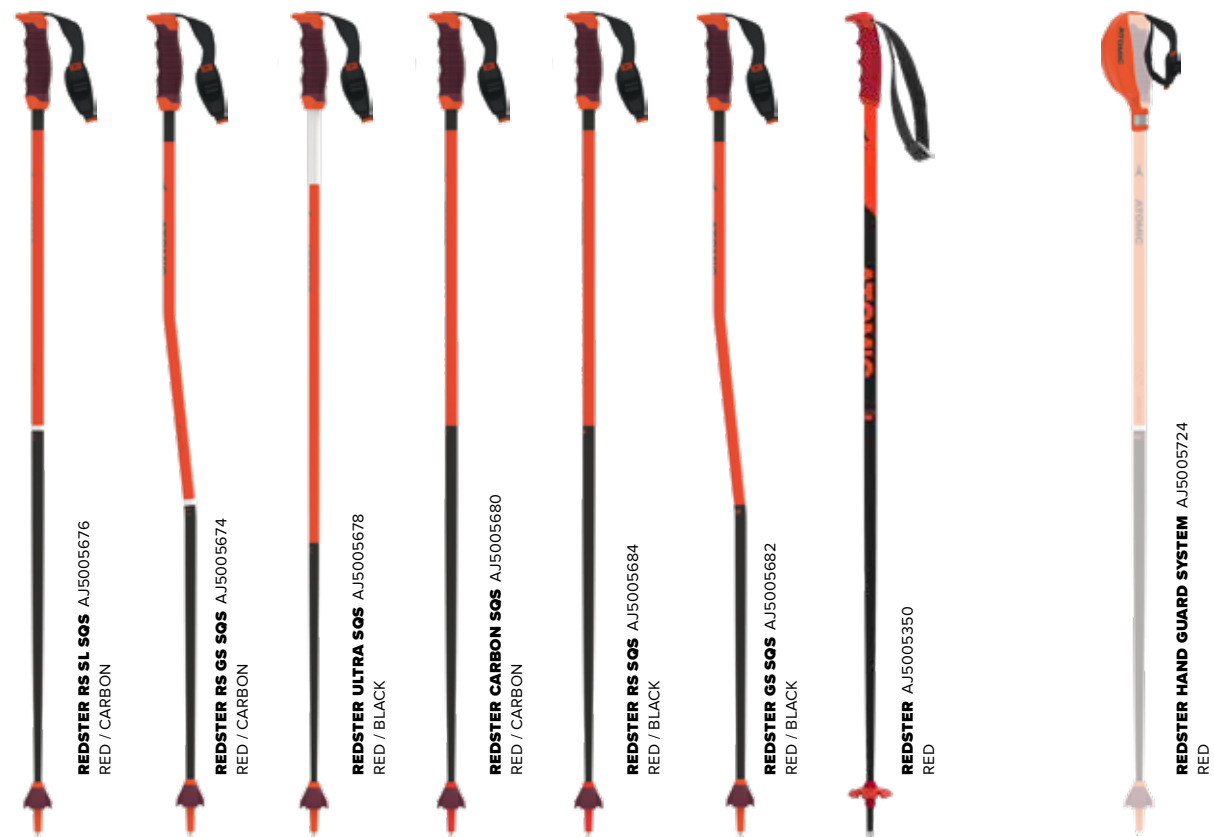

A robust external ski/walk mechanism that is durable, powerful and easily cleaned of snow and ice. Available on Backland V2 and Hawx Prime XTD this mechanism offers the widest range of forward lean adjustability with 13°, 15°, 17° configurations.

POLE TECHNOLOGIES

SQS – SAFETY QUICK RELEASE SYSTEM

The Atomic Safety Quick Release System (SQS) instantly releases your strap under tension to prevent injuries.

ADJUSTABLE LENGTH (TELESCOPE WITH POWER LOCK)

Our telescopic poles have an efficient and reliable lightweight locking system (Power Lock) for easy length adjustment to match the gradient of your climb.

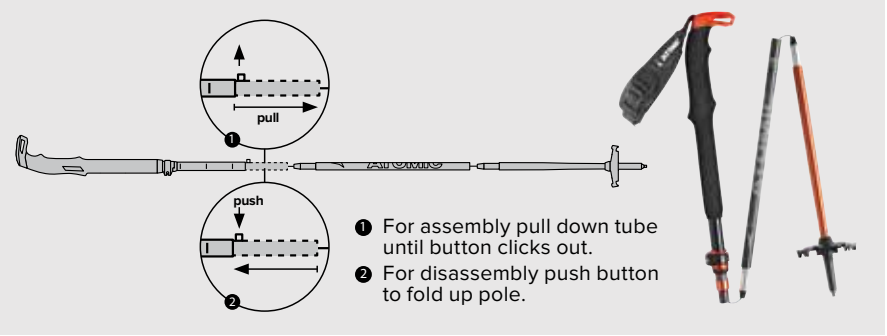

SKI BINDING SCREWDRIVER INSIDE

On specific models a ski-binding screwdriver (9mm phillips/flat-head) is integrated inside the shaft.

FOLDABLE POLE TECHNOLOGY

Our foldable poles are constructed just like a probe, from 5 pieces connected through a string inside. A push-button release mechanism allows the pole to be folded up to a length of just 40 cm.

# REDSTER SL

REDSTER SL CTD

### Feel safe as you race

The unique combination of AMID, Holo Core and an extra-durable PC Racecase delivers World Cup level protection. Redster SL CTD also features Shocksense for monitoring impact-damage from falls and gates. Dial up your safety, dial up your speed.

### Protect yourself with the perfect fit

The Redster SL is so snug you'll forget you're wearing it! It comes with a 360° Fit System and Atomic Live Fit – our unique memory foam system that molds to your head shape for an instant individual fit. Ready to face any race.

### Worn by our World Cup athletes

Speed and safety are in every detail of the Redster SL. It also comes with an adjustable Chin Guard in the box. It's the new Atomic helmet for all slalom racers, from young guns to our World Cup pros.

# SHOCKSENSE

### Analyze every impact

Every skier needs to know their helmet is safe to wear. Atomic Shocksense gives you that security. Its five impact-detection zones help assess the location and force of every impact then the app tells you if your helmet is damaged or still fully functional.

### Send an SOS automatically

If there's an emergency, people need to know immediately. With the in-built SOS function, if the force on your helmet exceeds a certain threshold, the Atomic Shocksense App sends an SOS alert containing your GPS data to your emergency contacts.

### Be safe everywhere

Our Shocksense technology is available for kids and adults across our range of racing, piste, all-mountain, freeski and Backland helmets. Whatever your level and wherever you go, ski safe in the knowledge that you're fully protected.

# BACKLAND

### Supreme touring protection

When pushing through the last climb on race day or making the final descent of a long tour, performance and protection can't be compromised. With AMID, Holo Core construction, and Shocksense, this lightweight helmet is everything you need to be your best in the mountains.

### Individual FIT, all-day function

If a piece of gear isn't comfortable you're less likely to choose it. And when that piece of gear is your helmet, its important to choose it every time. Backland helmets are built with Atomic's intelligent 360° Fit System, allowing adjustment on every axis, ensuring a perfect custom fit right out of the box.

### Made to move in the mountains

Whether you're on the line at a World Cup race or setting out for an all-day tour you need performance gear fueled by ski touring technology. With multi-norm certification, Backland helmets meet safety standards for skiing, climbing, and cycling. No matter how you move in the mountains, these helmets are designed so you can push your limits.

AFTERMARKET TECHNICAL SPECIFICATIONS

LENS GUIDE

We sell a range of extra lenses for our goggles: each lens offers a specific combination of tint and technology. In the table below, choose your goggle frame and your model (both in bold). Then see which lens types are available to buy for that specific model.

|                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                      |

# MORE THAN JUST PRODUCT

## TAILOR YOUR OWN RENTAL PROGRAM ACCORDING TO YOUR NEEDS

### 2. MOUNTING / LABELING

- Pre-mounted bindings
- Pre-equipped with bar codes

### 4. ADVANCED SHIPPING NOTIFICATION

- Provision of all product data for easy uploading into your rental software

### 6. SHOP IN SHOP TOOLS

- Shop design including displays
  - Staff apparel
  - Boot fitting tools

### 8. MARKETING SERVICES

- Customer activation
- Marketing support
- Rental Dealer Locator

### 1. PRODUCT

- Select from our broad offer for every type of skiing
- Including products from luxury to economy

### 3. SHIPPING

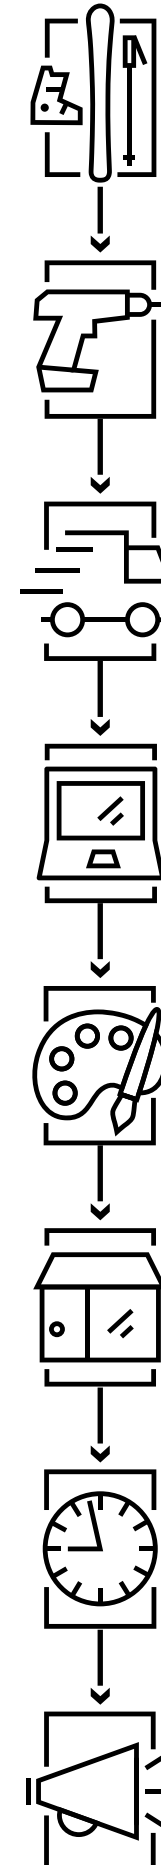

- Priority shipping
- Reduced packaging
- Labeling and packaging tailored to your needs

### 5. CUSTOM B2B

- Customized designs for skis, helmets and poles

### 7. AFTER SALES SERVICE

- Spare parts
- Warranty management

# WELCOME TO THE NEW ERA

## EASY RENTAL ASSISTANT

Increase rental potential and get more people out skiing in less time: Atomic's Easy Rental Assistant (ERA) is a holistic, intelligent rental platform that delivers a new level of speed and efficiency to any rental shop. The new Atomic ERA greatly reduces the need for support and time required to fit and adjust rental equipment through a simple and approachable method. The process is streamlined allowing customers an all new option to self-service their personal equipment needs before final shop inspection and check out if preferred.

### MORE TIME ON SNOW

Eliminate in-store overcrowding and get more skiers out on snow faster with an intelligent rental system specifically designed to save time and effort for shop staff and customers.

### INTERCONNECTED COLOR-CODING SYSTEM

A unified color-coding system is applied across all product groups, making it easier than ever to identify the correct size for the best possible fit. Color-coding also reduces adjustment time, helps the staff save time restocking the rental fleet and allows for a new level of customer self-service.

### THE PERFECT RENTAL SET-UP FORMULATED BY ATOMIC

Through intensive testing and research – from ski shape, correct boot fit, pre-set and fine-tuned binding adjustment – we have formulated a system that smoothly guides customers to the perfect rental set-up.

## RENTAL – JUST NOT AS YOU KNOW IT. WHAT'S NEW?

### THE FIRST COLOR-CODING SYSTEM FOR YOUR WHOLE SKIING SET-UP

Find your boot color-code first, then simply select that corresponding color for your skis, poles and helmet. Equipment selection and fleet restock made easy!

■ grey, ■ green, ■ blue, ■ red, ■ yellow

### EASY TO READ SHOE SIZES MARKED ON EACH PAIR OF BOOTS

Pick the right boot instantly with shoe (not mondo) sizes clearly labelled on the back of each boot.

### CUSTOMIZABLE BOOT FIT WITH FEWER SHELLS

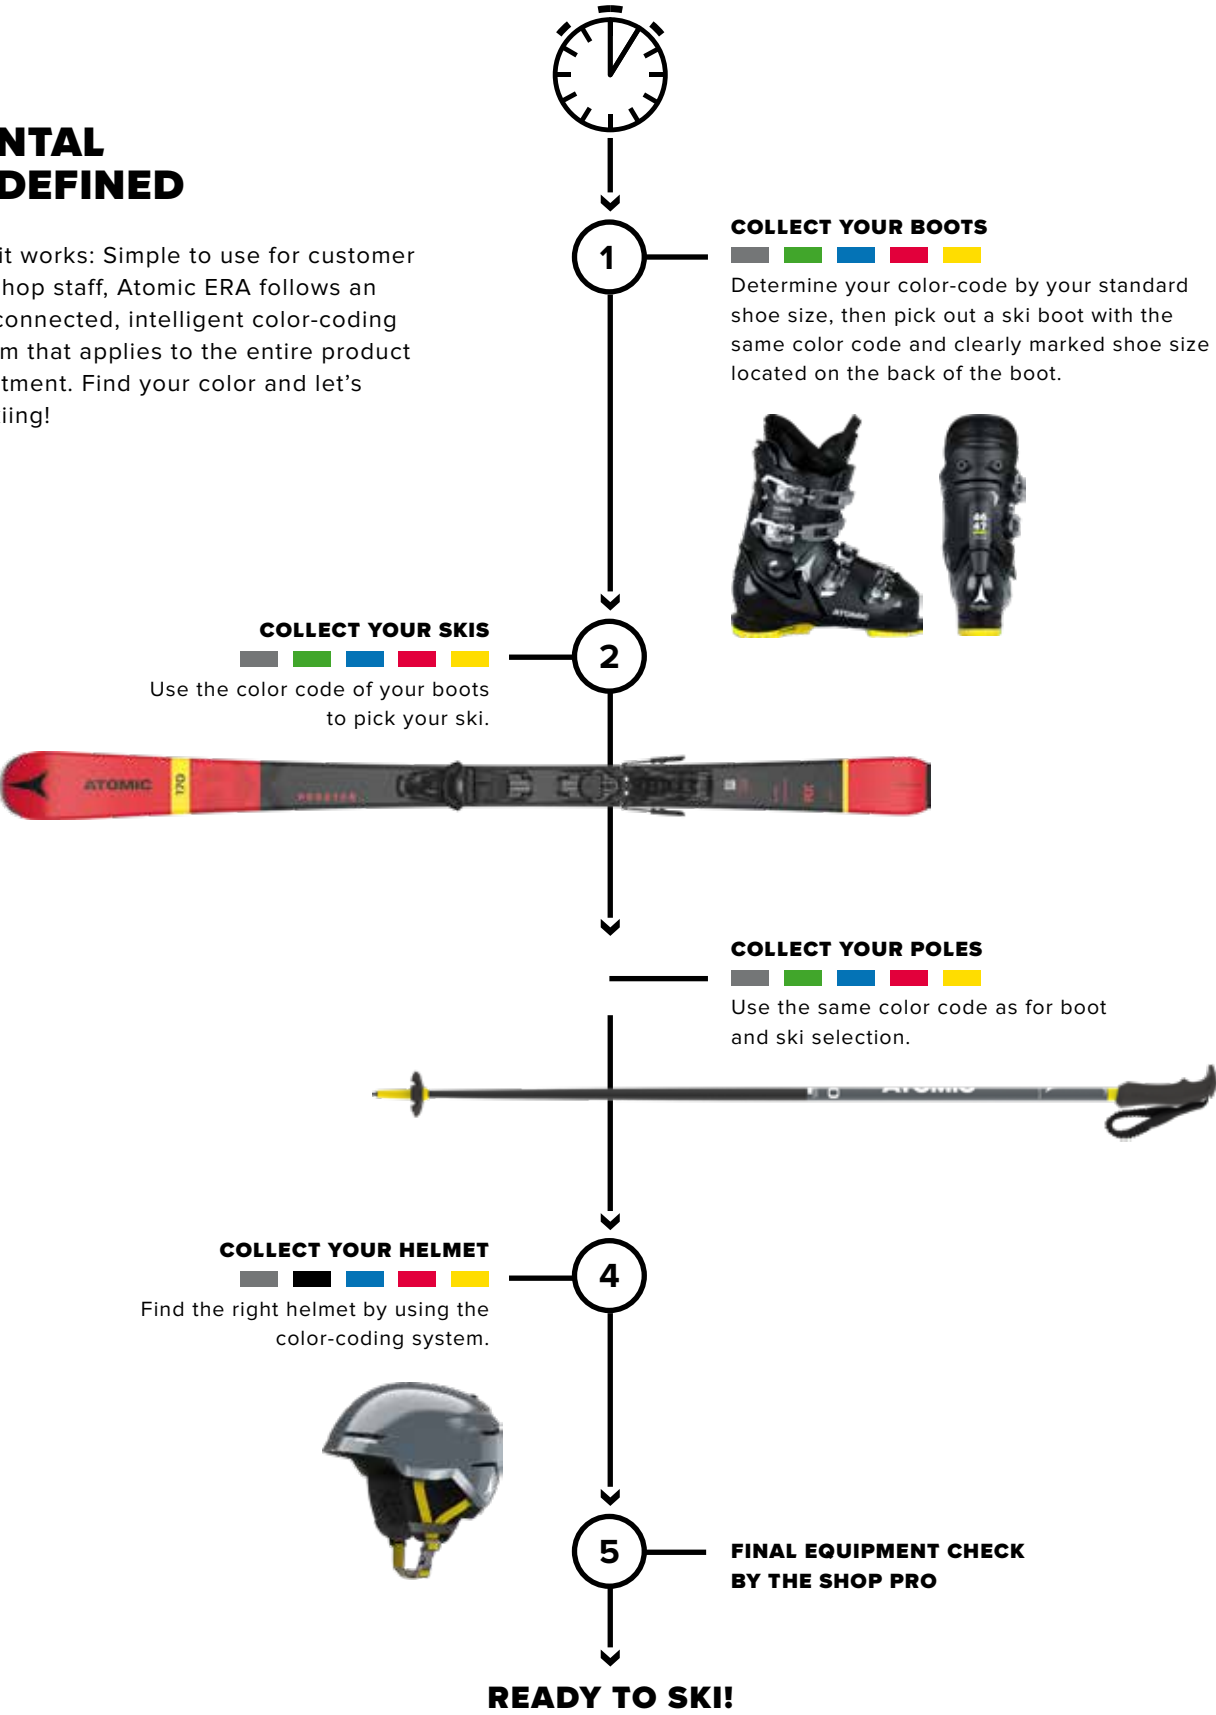

Utilizing low and high volume liners, create a perfect fit for every customer while incorporating only five shell sizes.

### SUPER-EASY BINDING ADJUSTMENT

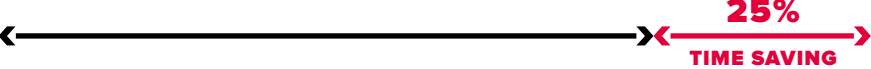

Thanks to the Leisuretrack Rental Plate and its color-coding system, there is no need for additional tools during binding adjustment.

## RENTAL REDEFINED

How it works: Simple to use for customer and shop staff, Atomic ERA follows an interconnected, intelligent color-coding system that applies to the entire product assortment. Find your color and let's go skiing!

SAVE TIME WITH ATOMIC'S NEW ERA SYSTEM

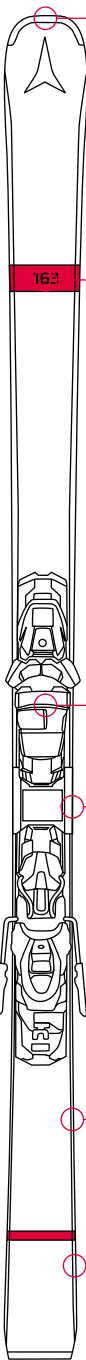

# BUILT FOR RENTAL

Lots of skiers love renting because it gives them the chance to try out the latest technology each year. So we're putting loads of time and effort into providing a great rental offer. In fact, we've made sure all our regular inline skis and boots are 100% rental ready. And we offer a range of products specifically tailored for rental, all featuring our latest technical advances.

## SKI

**TIP PROTECTOR**  
A stainless steel protector that's screwed in so it's easy to replace and extends the life of the ski.

**PM REDSTER RX ERA, PM REDSTER J2: COLOR-CODED SIZING**  
This skis are color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

- 70cm/120cm/156cm
- 80cm/130cm/163cm
- 90cm/140cm/170cm
- 100cm/142cm/150cm
- 110cm/149cm

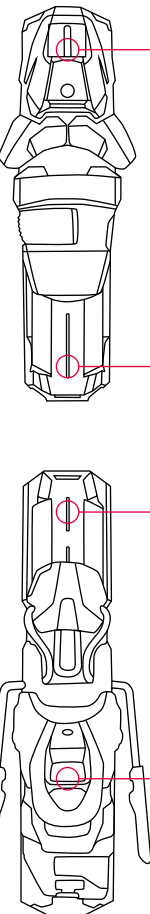

**BARCODE HOLDER**  
A special spot for a barcode on the binding.

**BEND-X TECHNOLOGY**  
A flex zone in the binding area of the Redster RX, Cloud 7 and all Junior models makes it easier to bend the ski using less power. This makes turning easier, even for beginners.

**ROBUST BASES AND EDGES**  
Our skis come with sintered bases and Dura Edge technology for more grinding cycles and greater durability.

**SLANTED SIDEWALLS**  
A construction with slanted sidewalls that avoids topsheet chipping and reduces scratches on the surface.

## BINDING

**EASY TO READ DIN VALUES**  
Lets you read DIN values on toe and heel in a second, then adjust to suit skier's weight, height, age and skiing level.

**EASY TO MOUNT**  
Really simple mounting saves you loads of time throughout the season.

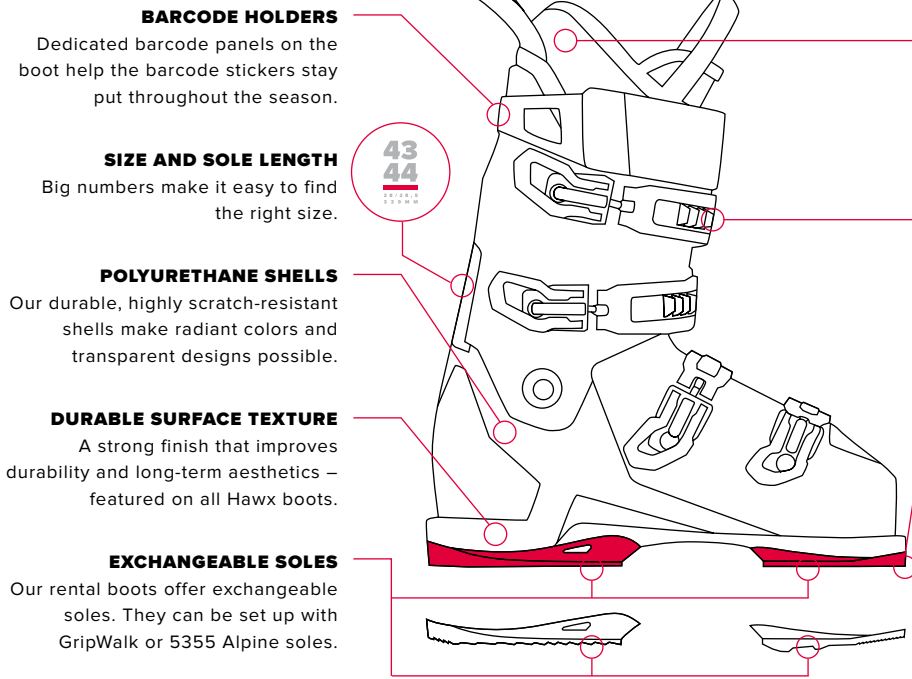

**LEISURETRAK PLATE**  
With easy-to-read, color-coded sole length information on the baseplate.

- 275mm
- 295mm
- 315mm
- 335mm
- 355mm

**TOOLLESS ADJUSTMENT**  
Easily adjustable sole lengths along with toe and heel components mean you can fine-tune a skier's position on their ski quickly and without tools.

**GRIPWALK**  
Our GripWalk-ready ski bindings are designed with perfectly fitting contact points, ensuring optimal power transfer to the ski and work with regular alpine soles (ISO 5355) as well as GripWalk soles. They need no toe height adjustment and offer a perfect fit and release.

## BOOT

**BARCODE HOLDERS**  
Dedicated barcode panels on the boot help the barcode stickers stay put throughout the season.

**SIZE AND SOLE LENGTH**  
Big numbers make it easy to find the right size.

**POLYURETHANE SHELLS**  
Our durable, highly scratch-resistant shells make radiant colors and transparent designs possible.

**DURABLE SURFACE TEXTURE**  
A strong finish that improves durability and long-term aesthetics – featured on all Hawx boots.

**EXCHANGEABLE SOLES**  
Our rental boots offer exchangeable soles. They can be set up with GripWalk or 5355 Alpine soles.

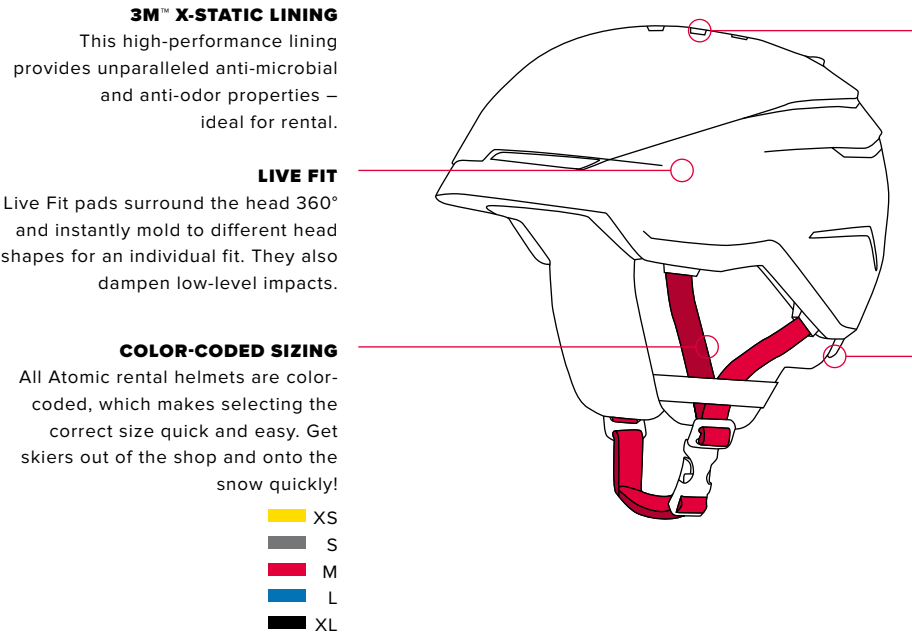

**COMFORTABLE, LONG-LASTING LINERS**  
Soft and warm liners retain their high-grade appearance and remain extremely comfortable for years.

**TOOLLESS ADJUSTABLE BUCKLES**  
We use buckles featuring adjustable tooth plates that can be easily shifted to fit different leg shapes.

**HAWX MAGNA R ERA: COLOR-CODED SIZING**  
This boot is color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

- Sizes: 22/23, Sole Length: 275mm
- Sizes: 24/25, Sole Length: 295mm
- Sizes: 26/27, Sole Length: 315mm
- Sizes: 28/29, Sole Length: 335mm
- Sizes: 30/31, Sole Length: 355mm

## HELMET

**3M™ X-STATIC LINING**  
This high-performance lining provides unparalleled anti-microbial and anti-odor properties – ideal for rental.

**LIVE FIT**  
Live Fit pads surround the head 360° and instantly mold to different head shapes for an individual fit. They also dampen low-level impacts.

**COLOR-CODED SIZING**  
All Atomic rental helmets are color-coded, which makes selecting the correct size quick and easy. Get skiers out of the shop and onto the snow quickly!

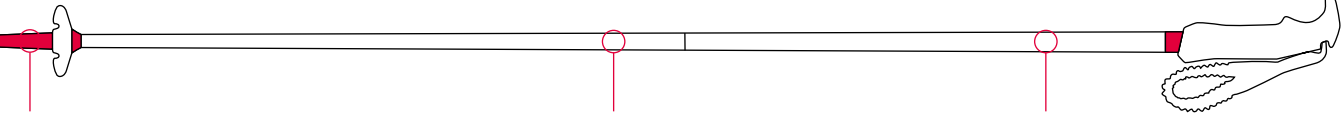

- XS
- S
- M
- L
- XL

**ACTIVE AIRCON VENTING**  
Aircon is our most advanced cooling system. The Holo Core offers wider and more air channels through each layer of the helmet which gives hot air room to escape while manually adjustable vents actively suck heat away from the head.

**FIT SYSTEM**  
Our rental helmets can be manually height-adjusted and fine-tuned using a small dial at the back for an even more precise fit.

**§ HELMET INDEMNIFICATION PROGRAM**

## POLE

**COLOR-CODED SIZING**  
All Atomic rental poles are color-coded, which makes finding the right size super easy. Get skiers out of the shop and onto the snow quickly!

- 70 cm/95 cm/120 cm
- 75 cm/100 cm/125 cm
- 80 cm/105 cm/130 cm
- 85 cm/110 cm/135 cm
- 90 cm/115 cm

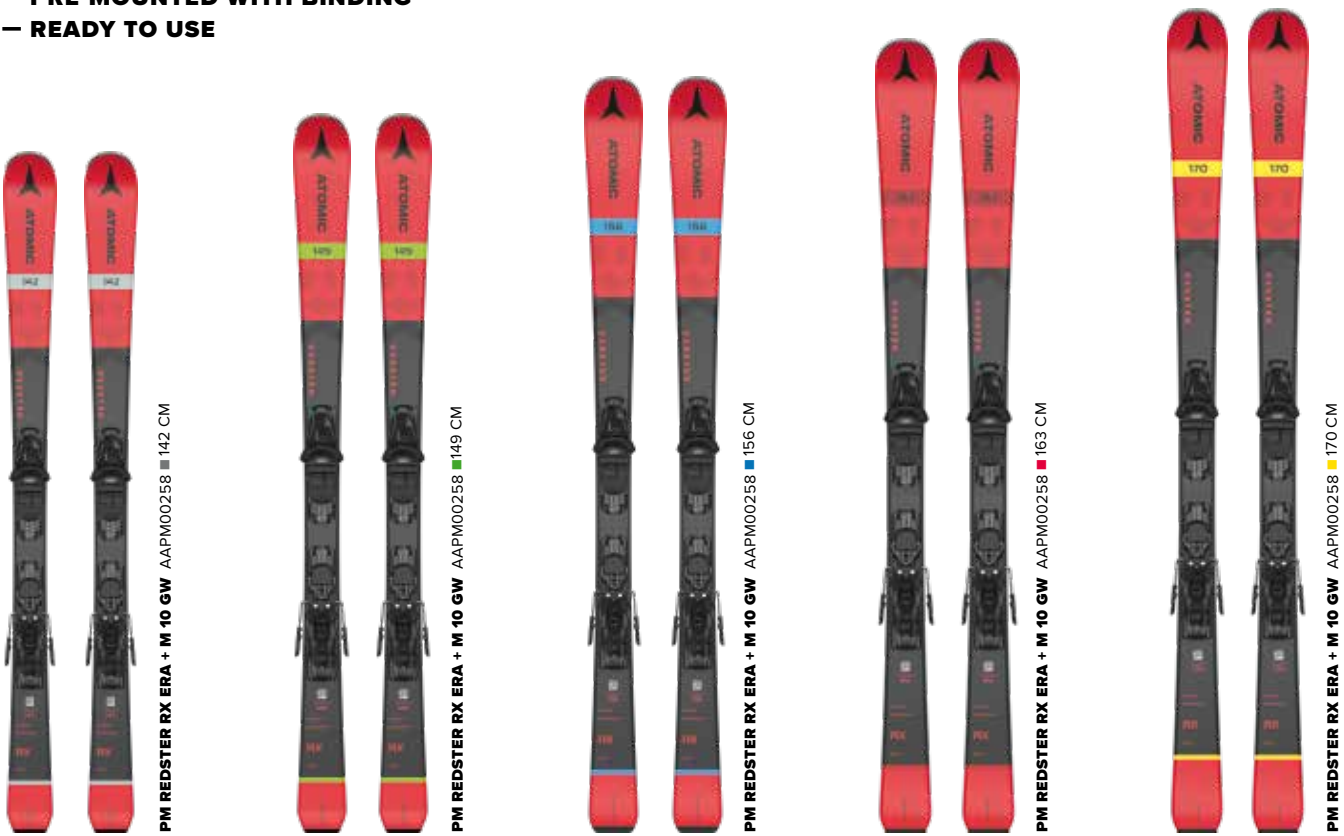

**LIGHTWEIGHT**  
We make all our rental poles from composite material or aluminum. Both really light and durable.

**HARD-WEARING COMPONENTS**  
These include more robust tubes, strong baskets and hard-wearing anodized graphics.

- 1 CHEST: The circumference of your chest is measured under your armpits, around your shoulder blades, and back to the front.
- 2 WAIST: Measure the circumference of your waist at your natural waistline, which is located above your belly button and below your rib cage.
- 3 HIP: Hip is measured at your widest point around the hip.
- 4 SLEEVE LENGTH: Measure from middle back to wrist (upper side of the sleeve).
- 5 INSEAM PANT: Measure from the top of your leg to the end of your leg (inside of the leg).
