COLLECTION

As passionate winter sports enthusiasts, inventors and engineers, we have pursued the goal of making the best skis for all facets of the sport since 1923. To do this, we invest continually in innovative production technology. With Germany as our home, we are geared up and ready for what comes next.

New, ultra-modern base and edge finishing lines have just been set up in our main factory in Straubing. These not only further enhance the performance, precision and quality of our skis but also significantly reduce energy and water consumption thanks to the use of state-of-the-art technology. We regard the prestigious label 'made in Germany' as not only a quality and branding promise but also as a great responsibility that we strive to live up to every day. With precision, a love of detail, perseverance, determination, ambition and a careful consideration of both man and nature, we want to drive and continually improve our sustainable vision of a circular economy. By continuing to invest in the local production site of Straubing – we can protect the future of the sport, for the future of our children and for the future of the next generation of Völkl brand ambassadors.

To achieve the above, our engineers and production technicians develop high-tech products that constantly give our sport new impetus. This is clearly demonstrated by brand new models with their numerous innovations. Völkl is far more than just a producer; we are a large team of passionate skiers. We all live for our sport and want to pass on our love of it to as many people as possible. Outdoor pursuits, adrenaline, competition, freedom, shared experiences – few other sports offer this combination. Skis take us away from our stress-filled everyday lives to places where we can forget everything around us. We live for and from winter sports and put all of our energy into them – after all, they give us such a huge amount back. We look forward to many amazing days on snow and a highlight-packed season.

HIGH TECH MADE WHERE WE LIVE AND SKI.

BAVARIA, GERMANY.

SMART SKIN CLIP

The Smart Skin Clip system allows the skier to decide, depending on the situation, whether to remove the skin from the tip or tail.

A standard snap hook at the tail of the ski allows the skin to be attached and detached from behind. The skin can, however, also be pulled on and off quickly and easily from the tip. This new versatility is made possible by an elastic snap hook, which is also easy to grip with gloves. A subtle depression in the ski tip gives the hook lateral guidance and prevents it from unintentionally releasing the skin while climbing.
